

THURSDAY WORKDAY

Imagine the Future

Thursday, September 24, 2026 / Room 14

8:00-8:20

Your home table

- Wearables: W1-W3 with Jennifer
- Robotics: R1-R3 with Stephanie
- Six students and three pairs at each table

Project inspiration / Today we practice and plan.

Thursday at a glance

8:00 a.m.-2:41 p.m. in Room 14. Stay at your home table and follow your mentor.

8:00-8:20	Welcome, mentor examples, and table groups	Today's finish line
8:20-11:09	Pathway practice, coding, and tests	Snack 9:25-9:38
11:09-11:17	Save evidence, count, and power off	Short reset break
11:17-11:45	Share, paper symbol, and NeoPixel preview	8 + 10 + 10 minutes
11:45-12:42	Three ideas, selection, and labeled sketches	Explain your choice
12:42-1:12	Lunch	Return by 1:16
1:16-2:21	Proposals, mentor reviews, pitches, and revisions	Next test and owner
2:21-2:41	Save, count, power off, label, and store	Ready for dismissal

Power off and return counted tools before every break.

8:20-11:09

Wearables practice

W1-W3 WITH JENNIFER

- Sew one felt LED circuit per practice pair.
- Battery out while sewing. Ask for inspection before power.
- At 10:05, return needles and open MakeCode.
- A = heart, B = happy, A+B = clear.
- Both partners code, test, and save their learning.

FINISH LINE

**A circuit observation and
a tested button response.**

Snack 9:25-9:38. Return by 9:42. Label
simulator-only results.

8:20-11:09

Robotics practice

R1-R3 WITH STEPHANIE

- Connect to your assigned Hummingbird Bit.
- Identify the actual input and its readings.
- Program a response using two output devices.
- Run three trials, change one thing, and retest.
- Swap Driver and Navigator. Save code and reset safely.

FINISH LINE

**Explain your input,
response, and safe reset.**

Two LEDs are the fallback. Label
untested motion or sensor work
deferred.

11:17-11:45 / Share, draw, and observe

PAPER FUTURE SYMBOL

After the 8-minute group share:
Draw a symbol for a future need.
Choose two colors and explain them.
Save your paper or digital sketch.

10 minutes / Wooden stitching is deferred.

OBSERVED NEOPIXEL PREVIEW

Watch the selected clip or diagram.
Sketch a possible hat-light pattern.
Describe A, B, and A+B off.
Label your evidence observed.

10 minutes / Physical strip testing is deferred.

11:45-12:42

Three ideas and a first sketch

DO THIS NOW

- Name a future user, community, or need.
- Sketch three ideas with different purposes or interactions.
- Choose one using today's practice evidence.
- Wearables: your own shirt-and-hat proposal.
- Robotics: one shared proposal with both partners' roles.

FINISH LINE

Three distinct ideas and a reason for your choice.

Lunch 12:42-1:12. Return by 1:16.
Power off before leaving.

1:16-2:21

Proposal studio and mentor review

DO THIS NOW

- Label your sketches and system behavior.
- Mark materials available, needed, or unconfirmed.
- Explain safety, comfort or stability, and repair access.
- Name the first test and what success would look like.
- Record your mentor's decision and the next test owner.

FINISH LINE

A reviewed proposal with an exact next action.

Reviews 1:16-2:00. Table pitches and revisions 2:00-2:21.

2:21-2:41

Final status and safe cleanup

APPROVED

Ready for the next design step within your mentor's approved scope.

PROVISIONAL

Record the missing physical test, its mentor owner, and the next school-time check.

REVISE + RETURN

Write the exact revision and arrange another mentor review.

TECH REVIEW

Hold the untested feature for Tri and your pathway mentor to check.

Save code and evidence. Power off, count tools, label storage, and record your next action.
